

Dade 1613.

A New Alma-
nacke and Prognosti-
 cation, with the forraine
 Computation :in vvhich you
 may behold the state of this
 yeare of our Lord God,
 1613.

*Being the first after the Leape
 yeare.*

¶ **Wrote and set forth by**
 Iohn Dade Gentleman, Practiti-
 oner in Physicke.

¶ **Printed at London for the**
 Company of Stationers.
 1613.

A briefe Computation of time com- plete, within this present yeare,

1613.

From the Creation of the World untill this present yeare are contained of yeares.	5575
From the Creation untill this generall deluge.	1657
From the Creation of the world untill Christ.	3963

Dade. 1613.

A
Prognostication:
In which you may be-
hold the state of this
yeare of our Lord
God. 1613.

Being the first after the Leape yeare.

Made and set foorth by *Iohn*
Dade Gentleman, practi-
tioner in Physicke.

Imprinted at London for
the Companie of Stationers,

1613.

A necessarie and perfe& Rule, to know the beginning and ending of euery Tearme, with their Returnes.

Hillary Tearme beginneth the xxiij. day of Iamuarie, (if it be not Sunday) which so being, it is then referred vntill the day following: And endeth the xij. of February; which Tearme hath foure Returnes. viz.

- | | | |
|----------------------|---|----------------------|
| 1. Octabis Hillarie. | } | 3. Crasti. purifica. |
| 2. Quind. Hillarie. | | 4. Octabis Purifica. |

Easter Tearme beginneth xviij. dayes after Easter, and endeth the Monday next after the Ascension day, and hath five Returnes: that is to say,

- | | | | | |
|-------------------|---|-----------------------|---|-------------------|
| 1. Quind. Pasche. | } | 3. Mense Pasche. | } | 4. Quinq; Pasche. |
| 2. Tres Pasche. | | 5. Crasti. Ascension. | | |

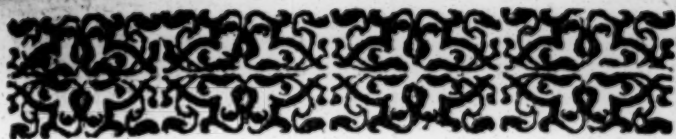

Trinitie Tearme beginneth the Fryday next after Trinitie Sunday, and endeth the Wednesday fourtnight after: And hath foure Returnes; that is to say,

- | | | |
|-------------------------|---|-----------------------|
| 1. Crastin, Trinitatis. | } | 3. Quind. Trinitatis. |
| 2. Octabis Trinitatis. | | 4. Tres Trinitatis. |

Michaelmas Tearme beginneth the ix. day of October (if it be not Sunday, as is before sayd) and endeth the xviij. of November: and hath eight Returnes. viz.

- | | | |
|---------------------|---|----------------------|
| 1. Octabis Michael. | } | 5. Crast. Animarum. |
| 2. Quind. Michael. | | 6. Crastino Martini. |
| 3. Tres Michael. | | 7. Octabis Martini. |
| 4. Mense Michael. | | 8. Quind Martini. |

Note also, that the Erchequer openeth eight dayes before any Tearme begin (except Trinitie Tearme;) in which it openeth but foure dayes before,

A Description of the

four Quarters of the yeare:

And first of Winter quarter.

1613.

Sol in v. m. x.

THE Winter quarter after the intade of Astronomers, began the xii. day of December 1612, and continueth until the i. day of March; so that alwayes the first part of the Astronomical Winter is in one politique yeare, and the latter end thereof in th'other: at which time, was the shortest day of the yeare, by reason of the Sunnes greatest declination from the Equinoctial Line.

This Season is of his owne naturall disposition, is knowne to be cold and moyst, contrary to the qualitie of Sommer: And in this Quarter, the inward partes of man are very hotte; and, being healthfull, may receiue great plentie of foode, because naturall heate is now comforted, and is gone inward, and there increased, and maketh Digestion the better.

A Prognostication.

Now the Weather will be therein disposed, is noted euery day through the whole Quarter.

The Griefes that accompanie this Quarter, wherewith many shall be soze grieued, yea some vnto death, are these and such like; namely, paynes in the Stomacke, Laskes of sundry sorts, the Chollicke and Tliacke passion, Falling sicknesse, and Soundinges; Diseases proceeding of rottennesse and corruption of Humors, rotten Coughes, thin Retumes, Head-ach, and such like; with diuers other Infirmities comining both to men and women; and to old persons, as well as to young.

Of the second part of the yeare, called the Spring.

Sol in γ. δ. II.

The Sunne hauing fully finished the Winter quarter with the last part of Pisces, beginneth the Spring, the x. day of March, then entring into the first minute of Aries, the Equinoctiall signe, and maketh the day & night of equall length; and continueth vntill the xi. of June.

This Season of this naturall qualitie is hott and moyst temperately, and likewise very healthfull,

Dade. 1613.

full, and is therefore accompted the fittest time in the yeare to ease Diseased bodyes in, and to restore health againe to those in whom it hath been decayed by any kind of euacuation.

The particuler condition thereof, may be seene in the dayly disposition of the season.

The Sickneses of this Quarter are Melancholy, Madnesse, the Falling sicknesse, Bleedings at the nose, Hoarcenesse, Coughes, Itch, Scabbes, many Ulcers, and small Apostumes, the Goute, and paine in the Joints. Plurisies, Dropsies, pestilent Agues, Shortnesse of breath, Faintinges, paines in the Head, Eyes, and Stomacke, rotten Feauers, new Agues, and some strange Diseases.

Of the third part of this yeare,
called the Sommer.

Solin S. N. m.

The third part of the yeare Astronomicall, called the Sommer Quarter, alwayes taketh his beginning at the Sunnes departure from the last degree of Gemini, into the beginning of Cancer: at which time, he maketh his greatest declination towards the North from the Equinoctiall, and

B 3.

causeth

A Prognostication.

causeth the longest day, and shortest night in the yeare, which is the xi. day of June: And so Sommer holdeth on after the Astronomers accompt, vntill the xii. day of September following.

The predominant qualities of this Season, according to his proper nature, are heate and drynesse, spreading them abroad in each part of mens bodies.

As for the present disposition of the Weather, you may plainly see in the dayly inclination.

The Sickneses at this time, are diuerse, as well threatned to men as women; namely burning Agues, Plurisies, Frenies, hotte Apostumes, diuers paynes in the Head, sundry Inflammations and new infirmities, proceeding especially of hotte chollericke humors, wherewith many shall be vexed, and not a few bereft of their liues this Quarter.

Of the fourth part of the yeare,
called Autumne.

Sol in \simeq . m. 7.

The Haruest Quarter, or Fall of the Leafe, euermore beginneth at the time of the Sunnes departure from the last scruple of the 30. degree of Virgo, into the first minute of the second Equinoctiall

Dade. 1613.

noctiall signe Libra, being the xii. day of September, and shall last untill the xii. day of December, when the Sunne shall enter into Capricorne.

This Season is naturally inclyned to be cold and dry; yet it is euermore disposed to be vncōstant & variable, by meanes whereof it is the nurse of most Sicknessees happening in the Spring.

And how the Ayre will be inclined throughout all Haruest, may be seene in the dayly disposition of the season.

The Diseases and Sicknessees most like to molest men in this Quarter, are these and such like: namely Opilations in the Splene, Costiuenesse, Shortnesse of Breath, Fretting in the Bowels. Falling sicknesse, and many other Melancholy effectes; Payne in the Sides, as Stitches and Crampes, or Conuulsions, Dropsies, Sciatica, the Strangurie, and Collicke; with many moe, too long to be told, vnpleasant to be heard, and very grievous to be suffered.

A brieffe

A Prognostication.

A briefe Description how the seauen Planets are placed about the Earth in the Skie, or vnder the Earth, for euery Month after Sunne setting; by which you may perceiue how they keepe their motion night and day all the year. Moreover, the good dayes of Sympathy touching mans complexion and body, in causes of administration of Physicke, or such like: And also, the Euill dayes (according to the malevolent aspectes of the Planets) in which it is dangerous to let blood, take vomits, purgations, sweates, or such like attempts,

Of Ianuarie.

- Saturne is nigh midde heauen at Sunne setting.
- Jupiter is to be seene in mid heauen in the mornings before the Sunne riseth.
- Mars appeareth in mid heauen after Sunne setting.
- Venus is vnder the earth at Sunne going downe.
- Mercury goeth downe with the Sunne.

The first and second dayes meetly fayre.

First Quarter on Sunday the iii. day, at two of the clocke 20. minutes in the after noone.

The iii. day apt weather for the time.

The iii. day windy.

The v. day fayre.

The vi. vii. and viii. dayes like to snow or fete.

The ix. day te mperate for the time.

New Moone on Sunday the x. day, at ix. of the clocke 30. minutes at night.

The x. and xi. dayes fayre and fresh weather.
